

*Guilty or Innocent* by Brian Rohrig

After reading the article, please answer the following questions.

1. John Dillinger known as "Public Enemy Number One" (there is a movie too) tried to obliterate his fingerprint. How did he do it? Was he successful?
2. What is Locard's exchange principle?
3. List different types of fingerprints and describe each type.
4. What are the sources of your latent fingerprints?
5. What is found in your sweat other than water?
6. What factors contribute to latent fingerprint left behind?
7. Discuss at least one type of power used to dust for latent fingerprints.
8. What is IAFIS? How is it used?
9. Can you figure out the gender by studying fingerprint left behind? How?
10. What are some new technology that is available for fingerprinting?
