Rohypnol (also known as Roofies/Date Rape Drug)

Generic Name: **Flunitrazepam**

Def: A powerful sedative that depresses the central nervous system

How is it used?

- swallowed as a pill
- dissolved in a drink
- snorted
- injected

tasteless and odorless

Short-Term effect

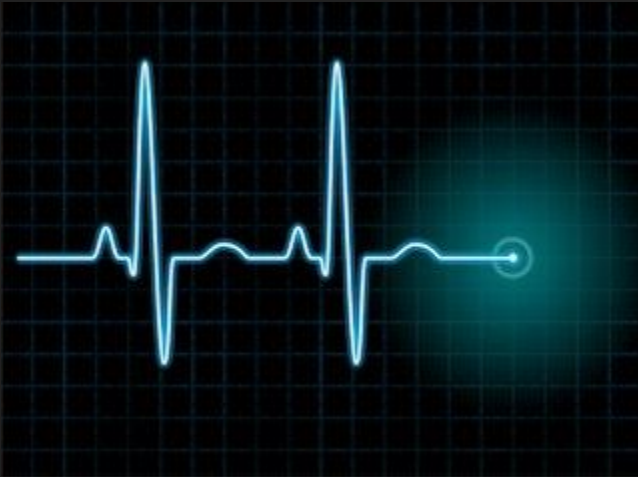

Short term effect

- Makes you feel sleepy
- Relaxed and drunk for about 2-8 hrs
- Blackouts
- Loss of memory
- Dizziness
- Disorientation
- Nausea
- And difficulty with motor movement and speaking
- These effects can appear 15-20 mins after someone takes it and can last 4-6 hours

Long-term effect

- Rohypnol is lethal when combined with alcohol or other drugs. It can slow the pulse and breathing, leading to unconsciousness, slowed heart rate, suppressed breathing, and ultimately death
- One can experience seizure week after the drug is taken
- And it can also lead to physical dependence.

Forensic Technology

Rohypnol can be found in drug tests like hair tests and urine tests.

IT'S ILLEGAL !!!!

The Federal Controlled Substances Act makes possession of any amount of the drug a crime carrying a significant potential prison sentence and fine.

A person convicted of using rohypnol faces prison term of not more than three years, a fine of \$5000, or both

(*each state has different penalties for drug possession*)
